PANKAJ BHATTA

(318) 350-5976 | Monroe, Louisiana | bhatta.pankaj@outlook.com | pankaj-bhatta.com.np | GitHub | LinkedIn

EDUCATION

University of Louisiana at Monroe **Monroe, LA**
Bachelor of Science in Computer Science *Expected Graduation: May 2028*
Relevant Coursework: Programming, Discrete Structures I & II, Computer Organization & Assembly Language, Data Structures & Algorithms, Networks Communication, Management Information Systems, Elementary Statistics, Calculus I, Linear Algebra, Artificial Intelligence

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, HTML, CSS
Machine Learning/Data Science: PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Weights & Biases (W&B)
Technologies & Tools: Databricks, React.js, Next.js, Firebase, REST APIs, AWS, EC2, Git, Linux, Figma, Netlify, Vercel, SDLC

EXPERIENCE

IT Support Analyst / Technician *Feb 2026 –Present*
University of Louisiana Monroe — IT Helpdesk

- Delivered 100+ hours of technical support to students and faculty, resolving issues related to computers, printers, software, and network connectivity.
- Resolved 100+ technical support tickets through in-person and phone assistance, ensuring fast troubleshooting and maintaining a 95% user satisfaction rate.
- Assisted 200+ students and 50+ faculty with account setup, password resets, system imaging, and domain/network configuration across the main campus.

Web Developer & Computer Teacher *Jan 2024 – Jul 2024*
Lok Aadarsha Academy, Kathmandu, Nepal

- Improved student pass rates by 45% by designing structured lesson plans and assessments for 100+ students.
- Delivered and launched a production website laa.edu.np, increasing online inquiries by 25% and streamlining parent communication.
- Revamped curriculum using interactive and collaborative teaching methods, driving a significant increase in student engagement.

PROJECTS

ACL Guardian: Injury Risk Prediction System | *Python, Machine Learning, Wearable Data Analytics* | GitHub
***Top 10 Finalist**, DevDays HealthTech Challenge — Baton Rouge, LA (Nov 2025)*

- Conceptualized and engineered a machine learning–based injury prevention system analyzing 4+ wearable sensor metrics (cadence, acceleration, asymmetry, exertion) to estimate ACL injury risk in athletes.
- Formulated a risk assessment model based on 10+ research insights from sports medicine literature (NCBI), identifying key movement imbalances and workload patterns linked to injury probability.
- Devised a real-time monitoring framework generating 3+ personalized recommendations (warm-up routines, load management, recovery scheduling) to support injury prevention.

Campesh | *React.js, Next.js, TypeScript, Firebase Authentication, Firestore* | Website

- Designed and built an end-to-end social platform for college students, owning the full SDLC from system design to deployment.
- Implemented real time community features including authentication, private access control, posts, comments, and notifications using React and Firebase.
- Validated product usability with 50+ student users, iterating on UX based on feedback and improving engagement and feature clarity.

CERTIFICATIONS

- Databricks Certified Generative AI Engineer Associate
- AWS Certified Cloud Practitioner
- Google Analytics for Beginners
- AWS Certified AI Practitioner
- Cybersecurity Fundamentals for Beginners EC-Council
- Fundamentals of Digital Marketing (Google)

LEADERSHIP & ACTIVITIES

Nepalese Students Association — Freshman Representative | Led cultural & social events. *(Aug 2024 – May 2025)*
Nepal Red Cross Society — Life Member | supported earthquake relief operations, aiding 1,000+ families. *(Jan 2023 – Present)*
